

Maryland Benefits from Airports

- Maryland's economic well-being is interconnected with its vibrant airport system and its robust aviation industry. The State's aviation system allows the community at-large to capitalize on an increasingly global marketplace.
- Aviation in Maryland both sustains and leads economic growth and development. Protecting and investing in airports will support the aviation industry and sustain the industry's positive impact on local, regional, and state economies. With continued support, Maryland's dynamic aviation system will continue to provide a significant economic return in the years to come.
- When the regional and local economic impacts of Maryland's 34 public-use general aviation and scheduled commercial service airports (excluding Baltimore-Washington International Thurgood Marshall Airport) are added together, over 9,900 jobs can be traced to the aviation industry. These employees receive more than \$583 million in total payroll, and generate nearly \$1.1 billion in total economic activity – over \$867 million in business revenue and \$272 million in local purchases.
- The total employment numbers for Maryland's public-use general aviation and scheduled commercial service airports includes nearly 5,000 direct jobs created by airport and visitor activity at these airports. Over 2,300 jobs were supported in local economic sectors as a result of purchases for goods and services by those 5,000 directly-employed workers; and, over 2,600 indirect jobs were supported by over \$272 million of local purchases by airport tenants.
- Nearly \$583 million dollars in personal wages and salary income was created in the State of Maryland by the activity at these 34 airports.
- Over \$867 million in business revenue was created from airport tenants, support services, and visitor services performed for the general aviation and scheduled commercial service aircraft and visitors using the 34 airports.
- Maryland's airports provide economic, health, welfare, and safety benefits to our residents from Fixed Base Operators (FBOs), maintenance/avionics businesses, charter aircraft operators, corporate flight departments, flight schools, military operations, and State/local law enforcement operations.

The Maryland Aviation Administration commissioned this study to measure the economic impact of airport activity generated by the State's 34 public-use general aviation and scheduled commercial service airports (excluding Baltimore-Washington International Thurgood Marshall Airport). The approved methodology for this study has successfully been implemented throughout the U.S. to quantify the value of airports and airport systems. The economic contribution of each airport in the Maryland airport system was measured in terms of jobs, personal income, state and local taxes, and revenue generated directly by airport activity, using a base year of 2017 for the analysis.

Determining the Impact

Maryland's airports contribute to both the State and local economy by generating business revenues from all types of aviation-related activities – aircraft operations and fuel sales; cargo and package freight service; goods and services provided to pilots and passengers; and, the rents, leases, and services of on-airport businesses. In turn, these airport-related businesses hire people and, through the salaries paid to those employees, additional spending is generated in the economy. In addition, these on-airport firms also purchase goods and services from local and regional vendors. Ultimately, all these jobholders pay taxes to state and local governments. The graphic below shows the economic impacts created by the airport and the statewide system, which are measured in terms of BUSINESS REVENUE, JOBS, PERSONAL INCOME, and TAXES.

BUSINESS REVENUE: Airport-related business revenue is defined as revenue generated by firms providing the services to the commercial airlines as well as to the general aviation aircraft, military aircraft, and to the flight schools. These firms providing the service and the individuals employed by these firms also pay state, local, and federal taxes.

JOBS: Airport-related employment consists of three levels of job impacts - direct, induced, and indirect employee impact. **DIRECT JOBS** are jobs directly generated by airport activity, which would vanish if activity at the airports were to cease. **INDUCED JOBS** are created throughout the regional economy because individuals directly employed due to airport activity, spend their wages locally on goods and services such as food and housing. **INDIRECT JOBS** are generated due to the purchase of goods and services by firms dependent upon airport activity.

PERSONAL INCOME: Personal Income consists of wages and salaries received by those directly employed by airport activity and includes a re-spending impact which measures the personal consumption activity in the region of those directly employed as the result of airport activity. Indirect personal income measures the wages and salaries received by those indirectly employed.

TAXES: State and local taxes are paid by businesses and individuals involved in providing services in support of airport activity.

Flow of Economic Impact

Tipton Airport

Tipton Airport is a public-use airport owned and operated by the Tipton Airport Authority. The Airport is located one mile southwest of Fort George G. Meade in Odenton, and is equidistant to Baltimore, Washington D.C., and Annapolis. The Airport maintains a single 3,000-foot by 75-foot asphalt runway (Runway 10/28) with a full parallel taxiway and non-precision approach capability. The Airport is included in the FAA's National Plan of Integrated Airport Systems (NPIAS), making it eligible to receive federal funds. Its role, as a Reliever, is to divert general aviation activity from larger commercial service airports and minimize delay and congestion at the larger scheduled commercial service airports, such as Baltimore-Washington International Thurgood Marshall Airport (BWI). Tipton Airport is one of six FAA-designated reliever airports in Maryland.

Airport users can obtain aircraft fueling services for 100LL and Jet A+ (via self-service) and minor plant service. Aircraft parking and storage is available on paved tie-downs and corporate or T-hangars. The Airport supports all types of general aviation activity including flight instruction and aircraft rental and sales, and charter flights. The 130 based aircraft at Tipton Airport are primarily single-engine aircraft, while roughly 20 percent are multi-engine aircraft and helicopters. The Airport serves the business, recreational, and flight training needs of the community. On-airport businesses include: DH Aviation providing maintenance services, 1 World Aero providing flight instruction and charter services, Monumental Helicopters providing flight instruction and aerial touring, Ft. Meade Flight Activity providing flight instruction, Helicopters, Inc. providing aerial news gathering, and MedStar Transport providing medivac air ambulance service and operating a maintenance base for its fleet.

Law enforcement units are also based at the airport. The Howard County Police Aviation Unit and the Anne Arundel County Police Aviation Unit provide aerial tactical support of ground units, aerial observation and pursuit, missing persons, search and rescue, tactical patrol operations, and extraordinary police incidents in their respective Counties. The Howard County Unit utilizes a single Bell 407 helicopter. The Anne Arundel County Unit utilizes three helicopters: one Bell 407 and two OH58 surplus U.S. Army helicopters.
