Maryland Benefits from Airports in 2023

- Maryland's economic well-being is closely linked to its vibrant airport system and robust aviation industry. The State's aviation infrastructure enables the broader community to benefit from an increasingly global marketplace.
- Aviation in Maryland both sustains and drives economic growth and development. Protecting and investing in airports will support the aviation industry and maintain its positive impact on local, regional, and state economies. With ongoing support, Maryland's dynamic aviation system will continue to deliver significant economic returns in the years to come.
- Maryland has 34 public-use airports; however, this study includes 33 of them, as it excludes Baltimore/Washington International Thurgood Marshall Airport.*
- Maryland's public-use airports account for over 10,000 jobs, including more than 5,000 direct jobs generated by airport and visitor activity.
- Of the over 10,000 total jobs, more than 2,500 included induced jobs that supported local economic sectors through purchases of goods and services by directly employed workers.
- Out of the over 10,000 total jobs, nearly 2,400 were indirect jobs supported by local purchases.
- Nearly $753 million dollars in personal wages and salary income was created in the State of Maryland by the activity at these airports.
- The industry contributes approximately $1.425 billion in total economic activity, which includes over $1.107 billion in business revenue from airport tenants, support services, and visitor services, as well as almost $312 million in local purchases.

10,225
Jobs Traced to the Aviation Industry

$1.107B
Business Revenue from Aircraft Handling Fees & Servicing of Aircraft

$1.425B
Total Economic Activity

2,381
Indirect Jobs

$312M
Local Purchase by Airport Tenants

$753M

Maryland Economic Impact of Airports

MARYLAND DEPARTMENT OF TRANSPORTATION
MARYLAND AVIATION ADMINISTRATION

The Maryland Aviation Administration commissioned this study for the calendar year 2023, to measure the economic impact of airport activity generated by 33 of the State's public-use general aviation and scheduled commercial service airports (study excludes Baltimore/Washington International Thurgood Marshall Airport). The approved methodology for this study has successfully been implemented throughout the U.S. to quantify the value of airports and airport systems. The economic contribution of each airport in the Maryland airport system was measured in terms of jobs, personal income, state and local taxes, and revenue generated directly by airport activity, using a base year of 2023 for the analysis.

Determining the Impact

Maryland's airports contribute to both the state and local economies by generating business revenues from various aviation-related activities, including aircraft operations and fuel sales, cargo and package freight services, goods and services for pilots and passengers, and the rents, leases, and services provided by on-airport businesses. In turn, these airport-related businesses hire employees and the wages paid to these employees generate additional spending within the economy. On-airport businesses also purchase goods and contract services from local and regional vendors. State and local governments benefit from an expanded tax base resulting from increased employment and the flow of goods and services. The graphic below shows the economic impacts created by the airport and the statewide system, which are measured in terms of BUSINESS REVENUE, JOBS, PERSONAL INCOME, and TAXES.

BUSINESS REVENUE: Airport-related business revenue is defined as revenue generated by businesses providing goods and services to commercial airlines, general aviation aircraft, military aircraft, and flight schools. These businesses providing the service and the individuals employed by these firms also pay state, local, and federal taxes.

JOBS: Airport-related employment consists of three levels of job impacts - direct, induced, and indirect employee impact. DIRECT JOBS are jobs directly generated by airport activity, which would vanish if activity at the airports were to cease. INDUCED JOBS are created throughout the regional economy because individuals directly employed due to airport activity, spend their wages locally on goods and services such as food and housing. INDIRECT JOBS are generated due to the purchase of goods and services by firms dependent upon airport activity.

PERSONAL INCOME: Personal Income consists of wages and salaries received by those directly employed by airport activity and includes a re-spending impact which measures the personal consumption activity in the region of those directly employed as the result of airport activity. Indirect personal income measures the wages and salaries received by those indirectly employed.

TAXES: State and local taxes are paid by businesses and individuals involved in providing goods and services in support of airport activity.

Flow of Economic Impact

Garrett County Airport

Garrett County Airport (2G4) is a public-use general aviation airport owned and operated by Garrett County. The airport is located approximately 13 miles northeast of Oakland between the towns of Accident and McHenry, Maryland. At an altitude of 2,933 feet, it is one of the highest-altitude airports in the eastern U.S.

The airfield consists of a single grooved asphalt runway that is 5,000-feet-long by 75-feet-wide with a full parallel taxiway and non-precision instrument approach. The airport is included in the FAA's National Plan of Integrated Airport Systems (NPIAS), making it eligible to receive federal funds. Its role, as a general aviation airport, is to accommodate the basic needs of general aviation aircraft and pilots.

Garrett County operates an fixed base operator (FBO) offering full-service 100LL and Jet A fuel. Aircraft parking and storage is available on paved tie downs and in T-hangars. Minor airframe and powerplant aircraft maintenance services are also available. The 30 based aircraft at the field are primarily single-engine aircraft with a few multi-engine aircraft and helicopters.

A modern terminal building is Americans with Disabilities Act (ADA) accessible and offers a comfortable place for pilots to develop flight plans and relax in the lounge. Travelers can enjoy a snack room with a comfortable lobby area. The airport is open 7 days a week from 8:00 a.m. until 6:00 p.m.

Located near Deep Creek Lake, the airport provides access to the scenic and recreational opportunities offered in Garrett County. Known for its beautiful mountains, Garrett County is home to snow skiing, mountain biking, hiking, white water rafting, camping, summer water activities, fishing, and hunting. These seasonal outdoor activities provide the backdrop for tourism, vacation getaways, local fairs, festivals, and heritage celebrations. The airport serves the business, recreational, and flight training needs of the community as well as supporting operations of the military, law enforcement, Department of Natural Resources, and Civil Air Patrol.
